High Pressure Oil Pumps

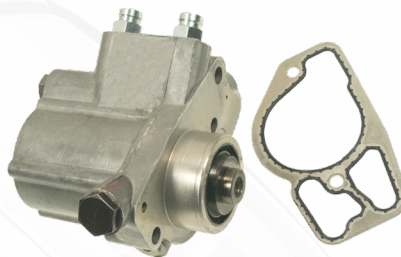

What Quality Remanufacturing Looks Like

All Standard® Diesel High Pressure Oil Pumps are the product of an exhaustive remanufacturing process at our TS16949, ISO9001, and ISO14001 certified facility. Throughout the course of the 10-step process, the pumps and their components are inspected, torn down and validated, cleaned, reassembled, and tested. With the detailed process in place, we can say with confidence that we provide the finest-quality High Pressure Oil Pumps. Plus, each High Pressure Oil Pump features Standard-engineered enhancements to ensure proper sealing and improved performance.
