Standard Motor Products Releases 25 New Parts for TechSmart®

New York, N.Y. July 21, 2017 Standard Motor Products, Inc. (SMP) announces the addition of 25 new part numbers to its TechSmart® line. The release expands coverage through the 2017 model year by more than 53 million additional VIO.

The highlight is the addition of a new, exclusive product category, TechSmart's Oil Pump Solenoid that allows technicians to replace only the failed solenoid instead of the entire pump, saving both time and money. Other notables include expansions to key product lines such as air door actuators, alternator decoupler pulleys, HID headlight ballasts, and park assist sensors. To view all highlights, watch TechSmart's latest 'New Parts Spotlight' video at www.youtube.com/TechSmartParts.

Commenting on the release, Phil Hutchens, Vice President Engine Management Marketing, SMP, stated, "Our exclusive, new Oil Pump Solenoid is just the latest example of how TechSmart provides solutions for problems that technicians face in the bay."

All new applications are listed in the eCatalogs found at www.techsmartparts.com as well as in electronic catalog providers.

With over 100 categories and more than 500 exclusive products, TechSmart® continues to deliver what technicians need for today's complex vehicle systems. For additional information, contact an SMP sales representative or visit www.techsmartparts.com.

About SMP:

SMP supplies independent professional auto technicians and automotive do-it-yourselfers with high quality replacement parts for engine management ignition, emission and fuel systems as well as temperature control products for domestic and import cars and light trucks. SMP products are sold through both traditional and non-traditional distribution channels. For more information, download the SMP® Parts App 2.0 or visit www.smpcorp.com.
